Dear Rocksand Computers Ltd,

Crowther Contract Carriers Ltd has just purchased Pitstop Flag (Company Version) and we are very pleased.

We used the demo version first and were amazed at the number of driver and vehicle reports that were available and the working time directive monitoring.

Also wow, the speed of the downloads from the Optac Tool !

We had previously used **Optac Fleetviewer** and the Optac Tool which has an annual charge of more than the total charge of Pitstop Flag, very few reports and so very slow downloading from the Optac Tool.

Yours Sincerely

Mike Vear
