Good morning Paul,

It's a daunting step moving from an Analogue to a Digital Tachograph and the problem is compounded if, like ourselves, your vehicles are fitted with both types with drivers regularly using both types throughout the day. However, without doubt, Pitstop (Company Version) along with the Tachospeed Module is the answer!

The Analogue/Digital 'same day driving' integration is amazing and I'm pleased to confirm that it is a brilliant software setup that has certainly transformed our Driver/Vehicle Analysis/Record Keeping!

It makes the uncertainty of 'manual' chart checking a thing of the past, brings the analogue charts into the digital age and certainly makes the ability to comply with all the legal requirements much, much easier!

Needless to say, the information, advice and prompt help from yourselves is very much appreciated!

Many thanks and kind regards

Robin Bailey (Director)
